Hackathon Project Submission Checklist (Items 1 – 6)

Team Strawhats (Team Code: 627JUH) • Theme 2: Climate, Resource Infrastructure & Global Supply Resilience

1. PROBLEM STATEMENT

• Target Issue & Context: City-wide weather alerts ('40°C Pune') mask lethal 44.2°C micro-zone heat traps while afternoon heat spikes trigger MSEDCL grid blackouts and municipal water cuts. Without spatial deficit math, NGOs dispatch water tankers blindly and workers miss early anhidrosis (stopped sweating) signs.

• Target Audience: (1) 10M+ Outdoor Gig & Transit Workers (delivery riders, street vendors, traffic police, construction crews) & (2) NGO Volunteer Leads & Municipal Disaster Response Teams.

2. SOLUTION DESCRIPTION

• High-Level Overview: Splits Pune into 64 micro-zones (Z-00 to Z-77) ranked by real-time Relief Deficit (Rd). Gemini 2.5 Flash converts English/Hindi/Marathi voice or text into tool-verified WhatsApp dispatch briefs, while Gemini Vision audits crowd broken-tap & worker distress photos.

• Technical Architecture: FastAPI + React 18 + Leaflet + SQLite. Python deterministically computes Eh, Vh, Rd from live Open-Meteo (72h forecast), WorldPop v2 (demographics), and OSM Overpass (water/clinics).

3. PROTOTYPE LINK (LIVE DEPLOYMENT)

• Live Hosted Web App: https://heatatlas.vercel.app/

• Live API Health & Data Check: https://heatatlas.vercel.app/api/health

• Interactive OpenAPI Swagger Docs: https://heatatlas.vercel.app/docs

4. DEMO VIDEO (2–3 MIN END-TO-END LIVE DEMO)

• Official YouTube Demo Link: https://youtu.be/C0-BQNND-b8

• Direct Hosted MP4 Mirror: https://heatatlas.vercel.app/demo.mp4

• Highlights live AI reasoning, multi-step tool execution, Vision anti-spoofing & 3 portals.

5. GITHUB REPOSITORY LINK

• Public GitHub Repo: https://github.com/vishwjeetlol/heatatlas

• Includes clean README.md, specs.md, ARCHITECTURE.md, .env.example, prompts/, and 9/9 passing pytest acceptance tests (tests/test_heatatlas.py).

6. PRESENTATION / PITCH DECK (6-SLIDE PDF)

• Live Pitch Deck PDF: https://heatatlas.vercel.app/HeatAtlas_Pitch_Deck.pdf

• GitHub Deck Link: https://github.com/vishwjeetlol/heatatlas/blob/main/HeatAtlas_Pitch_Deck.pdf

• Submission Checklist PDF: https://heatatlas.vercel.app/HeatAtlas_Submission_Checklist.pdf
