Hackathon Project Submission Checklist (Items 1 – 6)

Team Strawhats (Team Code: 627JUH) • Theme 2: Climate, Resource Infrastructure & Global Supply Resilience

1. PROBLEM STATEMENT

• Problem: Macro forecasts (e.g. 42°C Pune / 45°C Delhi) mask lethal micro-canyon heat traps where asphalt elevates heat by 5°C–8°C, while afternoon heat spikes cause grid failures and water cuts. NGOs dispatch water tankers blindly without knowing ward-level deficit.

• Target Audience: (1) 15M+ Outdoor Gig & Transit Workers (Zomato/Swiggy/Blinkit riders, drivers, laborers) facing exertional heatstroke, and (2) NGO Volunteer Leads & Municipal Disaster Teams coordinating scarce water & medical relief.

• Why Theme 2: Solves Climate Resilience (adapts to severe wet-bulb heatwaves across 8 major cities), Resource Infrastructure (bridges municipal water & power grid cuts), and Global Supply Resilience (protects frontline gig workers who sustain urban supply chains).

2. SOLUTION DESCRIPTION

• High-Level Overview: HeatAtlas is a predictive heatwave relief platform built for India's major vulnerable cities—Pune, Nagpur, Mumbai, Delhi NCR, Chhatrapati Sambhajinagar, Nashik, Solapur, and Nanded. It divides each city into 64 micro-zones to forecast dangerous wet-bulb heat and water deficits in real time.

• For Workers: 1-tap radar to nearest drinking water kiosks, shaded parks, cooler walking corridors (34% less heat), and rapid Hindi/Marathi voice SOS beacons.

• For NGOs & Municipalities: Automated Gemini Vision audits for distress photos, smart priority dispatch routing water tankers and medical teams where lives are at risk, and instant WhatsApp squad orders.

3. PROTOTYPE LINK (LIVE DEPLOYMENT)

• Live Hosted Web App: https://heatatlas.vercel.app/

• Live API Readiness & Telemetry Probe: https://heatatlas.vercel.app/api/health

• Interactive OpenAPI Swagger Docs: https://heatatlas.vercel.app/docs

4. DEMO VIDEO (2–3 MIN END-TO-END LIVE DEMO)

• Official YouTube Demo Link: https://youtu.be/E7Kn1yrEejY

• Direct Hosted MP4 Mirror: https://heatatlas.vercel.app/demo.mp4

• Highlights live AI reasoning, Constrained DP allocation (399 people served), 2-step CNS + Anhidrosis triage, Vision anti-spoofing & 3 portals.

5. GITHUB REPOSITORY LINK

• Public GitHub Repo: https://github.com/vishwjeetlol/heatatlas

• Includes clean README.md, specs.md, ARCHITECTURE.md, .env.example, prompts/, GitHub Actions CI, and 17/17 passing pytest acceptance tests (tests/test_heatatlas.py).

6. PRESENTATION / PITCH DECK (6-SLIDE PDF)

• Live Pitch Deck PDF: https://heatatlas.vercel.app/HeatAtlas_Pitch_Deck.pdf

• GitHub Deck Link: https://github.com/vishwjeetlol/heatatlas/blob/main/HeatAtlas_Pitch_Deck.pdf

• Submission Checklist PDF: https://heatatlas.vercel.app/HeatAtlas_Submission_Checklist.pdf
